

So adventurous, so rugged,
so beautiful, it could only be called...

Denali

by FLIGHTCOM 

- Weighs less than 14 ounces
- Extra-thick ComLeather ear seals
- Soft-touch carbon-fiber look domes
- High-fidelity stereo speakers
- TwistFlex head band
- Three-year limited warranty

Alaska's Mt. McKinley – *Denali* in the local language – is the perfect backdrop to introduce Flightcom's newest generation of headsets. Flightcom brings nearly 30 years of award-winning design experience to its Denali series to achieve new heights in reliability, performance, and value.

Whatever adventure you have planned, you can count on Denali to get you there in comfort and style.

D90ANR

Our top-of-the-line headset

Features vary by model. See chart below for specifications.

Adventure reimagined

Weighing as little as 11 ounces, each Denali model is packed with features that are sure to please the most discriminating pilot. One look shows you that these are no ordinary headsets. From the sleek carbon-fiber look domes to the supple ComLeather ear seals, Denali headsets are designed to look good, feel great, and deliver uncompromising performance under the most challenging conditions.

For our top-of-the-line D90ANR model, we've added a brand new slimline battery sleeve that delivers up to 50 hours of active noise reduction from two AA batteries through our SurePower™ battery saver. We've also added cell phone and MP3 stereo inputs, allowing you to listen to your favorite music during flight. And you needn't worry about missing an important ground communication — our automatic muting system instantly silences auxiliary audio devices when a radio transmission is received.

Best of all, no matter which of the four Denali models you choose, you'll have the confidence that comes from knowing your headset is covered by a three-year limited warranty.

Denali headsets at a glance

Model	Weight	Passive noise reduction	Active noise reduction	Cell phone/MP3 inputs	Ear seals	Dome color	Power source	Average battery life [†]	Configuration	Stereo/monaural	Warranty
D90ANR	13.4 oz	21dB	+18-20dB	Yes	ComLeather	Carbon fiber	2 "AA" batteries	50 hrs	Fixed-wing	Dual	3 year
